SUBJECT: RM-10051

Please give serious consideration to rescinding this request/document:

1. Use of unlicensed transmitters in the RFID Tag System, as proposed in the 425-435 MHz spectrum, does not appear to fit the guidelines required in Part 15 because field strengths and duty cycles are too high.
2. Would implementation under Part 19 (Industrial, Scientific & Medical) be a better fit?
3. Interference by the proposed transmitters to Amateur Radio development programs and public service will be severe via unpredictable events.

Thank you for your serious consideration.

Sincerely,

Curtis V. Rocke
